Vicknesh Balasubramaniam

Senior Mobile Application Developer / Mobile Architect

roninprogrammer@gmail.com linkedin.com/in/vickneshbalasubramaniam github.com/roninprogrammer

Nilai, Negeri Sembilan, Malaysia

01 / SUMMARY

Mobile architect with 14+ years shipping Android, React Native, Ionic and Flutter apps across aviation, telco, retail, mobility and F&B. Currently leading offline-first Flutter platforms at AFED Digital, with earlier roles at Maxis and AirAsia. Experienced in architecture, delivery pipelines, payments integration, technical team leadership and client requirements, and now moving into product management.

02 / EXPERIENCE

AUG 2025 – PRESENT

Senior Mobile Application Developer / Mobile Architect · AFED Digital

- Led the mobile platforms for Gratzels and Cravee from the ground up with an offline-first strategy, Clean Architecture and Riverpod.
- Integrated Shorebird over-the-air updates into the delivery pipeline, so fixes ship without app store delays.
- Advise product and engineering teams on mobile architecture, including the Flutter framework for the upcoming JobGiga platform.
- Built eKYC flows using Tesseract OCR.

Flutter · Dart · Riverpod · Android · Firebase · Shorebird · Go

MAR 2021 – JUN 2025

Senior Mobile Application Specialist · Maxis

- Technical manager and developer for the retail apps mSell, Discovery Retail, SMART and HERO.
- Led the move from a monolith to microservices in three months: dependency analysis, team training and stakeholder buy-in.
- Owned requirements, proposals and estimates, and kept quality high with code reviews, test coverage and steady refactoring.
- Built with defense-in-depth security, monitored services and took part in incident response and post-incident reviews.

Kotlin · RxJava · Retrofit · Data Binding · MVVM · Espresso · Jira · Figma

FEB 2020 – MAR 2021

Senior Software Developer · SmartRetail

- Built New World Development's Mask To Go vending app on industrial Android 7.1 hardware.
- Built the OpenCV face-detection library and paired it with AWS Rekognition to raise capture rates.
- Worked on the FIVE petrol station engagement project.

Java · Kotlin · Node.js · OpenCV · AWS Rekognition

JUL 2019 – MAR 2020

Senior Software Developer · Tech Lead · DACSEE

- Migrated the app to AndroidX and refactored MobX state management to best practices.
- Traced battery drain to aggressive HTTP polling, cut the interval and moved the team toward sockets; built a geolocation debug console.
- Built and open-sourced a native SMS Retriever module for React Native. Load-tested with JMeter, unit-tested with Jest and Enzyme.

React Native · MobX · Java · Jest

AUG 2018 – JUL 2019

Software Developer · Syntronic

- Built the ASCERO transport and warehouse management apps in Ionic and Flutter, plus TASCO eTrak.
- Added offline mode on SQLite for complex cached objects, with data flow designed in MVVM and BLoC.

Flutter · Ionic · Angular · TypeScript · BLoC

AUG 2016 – AUG 2018

Software & Mobile Architect · AirAsia

- Mobile architect and developer for the AirAsia flight booking app, and governed the mobile tech stack.
- Integrated Card.IO card scanning and a promo-code scanner.
- Designed mobile logging on Elasticsearch with Kibana dashboards for usage and errors.
- Software architect for Big Duty Free and PayFirst on AWS and Magento.

Kotlin · Java · Retrofit · Realm · Jenkins · AppDynamics · Kibana

FEB 2014 – AUG 2016

Application Developer (Android) · Sobonus Solution

- Built Treatsup (mobile top-ups and points), the VZOID cosmetics store, FBMALL and Cherry Radio.
- Added offline mode with Realm, a WebSocket chat and an encrypted SQLite database; shipped to Google Play.

`Android · Java · Realm · Parse · Volley`

JAN 2013 – FEB 2014

PHP & PhoneGap Developer · Wiseyes Solution

- Built the Commalert SOS app with PhoneGap and Google Maps, and its admin panel in PHP Symfony.

`PhoneGap · Cordova · PHP · Symfony`

JAN 2012 – JAN 2013

Part-time Android Developer · Ahead Mobile

- Built the UI for the Maxis and Digi Friend Finder app.

`Android · Java · XML`

03 / FEATURED PROJECT

APR 2026 – PRESENT

Santé: loyalty & order-ahead platform · Architecture lead & sole developer

- Designed and built the full system: Flutter app (40+ screens), Go backend on Encore (14 services, 284 endpoints), Nuxt 3 admin and PostgreSQL (~64k lines).
- FPX and Cybersource payments behind one gateway interface with signature-verified webhooks; two-way POS sync; Grab Food and Shopee Food order intake.
- Loyalty engine with points, tiers, missions and vouchers; offline-first cart; per-device sessions. In UAT with 189 test cases.

04 / APPS ON THE STORES

GOOGLE PLAY	**Gratzels** · AFED Digital
GOOGLE PLAY	**Maxis DealerApp** · Maxis · 100K+ installs
GOOGLE PLAY	**Maxis SMART** · Maxis · internal · 5K+ installs
APP STORE	**LeadsBoosts** · Fortune Bit Solutions
GOOGLE PLAY	**1tusk** · Avantech Consultancy

05 / SKILLS

MOBILE ARCHITECTURE	Clean Architecture, Feature-first, MVVM, MVP, BLoC, Repository pattern, Dependency Injection
FLUTTER & STATE	Flutter, Dart, Riverpod, BLoC, Provider, GoRouter, Dio
ANDROID NATIVE	Kotlin, Java, RxJava, Retrofit, Dagger, Data Binding, Espresso
CROSS-PLATFORM	React Native, MobX, Redux, Ionic, Angular, TypeScript
DATA & OFFLINE	Drift, SQLite, Realm, Offline-first, MongoDB, MariaDB
CI/CD & RELEASE	Shorebird OTA, Jenkins, AWS CodePipeline, Gradle, Git, TestFairy
CLOUD & MONITORING	Firebase, AWS, Google Cloud, Kibana, Elasticsearch, AppDynamics
PAYMENTS & VISION	DuitNow QR, Card terminal ECR, OpenCV, AWS Rekognition, Tesseract OCR, eKYC

06 / EDUCATION

IN PROGRESS	**Master of Business Administration (MBA)** Universiti Tun Abdul Razak (UNIRAZAK)
2008 – 2012	**B.IT (Hons), Software Engineering** Bachelor of Information Technology
2006 – 2008	**Diploma in Information Technology**

07 / FREELANCE

FLUTTER	**JomSport** · Sport venue booking
IONIC	**Karecord** · Vehicle maintenance tracker
REACT NATIVE	**BeliNow** · E-commerce
ANDROID	**GoodMorning Global** · E-commerce
ANDROID	**YL Images** · Banner e-commerce
